Wikipedia:Requests for comment/May 2010 skin change/Bug reports This includes font issues, broken user scripts and gadgets, and anything that was working before the skin change that is not working anymore. I'm guessing older browsers and other phones have similar problems. Even if you have reported the problem elsewhere, if it hasn't been fixed, please report it here so it can be in a centralized location. The Palm Treo enter button seems to do nothing If you still notice any problems, however small, with the new interface, please report them here. nothing to click when using Palm Blazer ¶

history ¶ Future of Wikinews (including potential merger with Wikipedia) and establishment of Wikispore ¶ Keyboard keys (buttons) typically have a set of characters engraved or printed on them, and each press of a key typically corresponds to a single written symbol. However, producing some symbols may require pressing and holding several keys simultaneously or in sequence. While most keys produce characters (letters, numbers or symbols), other keys (such... ¶ watch ¶

BlackBerry BlackBerry began to offer email service on non-BlackBerry devices, such as the Palm Treo, through the proprietary BlackBerry Connect software. The first BlackBerry was a pager-like device launched in 1999 in North America, running on the Mobitex network (later also DataTAC) and became very popular because of its "always on" state and ability to send and receive email messages wirelessly. The original BlackBerry BlackBerry (BB) is a discontinued brand of mobile devices and related mobile services, originally developed and maintained by the Canadian company Research In Motion (RIM, later known as BlackBerry Limited) until 2016. The BlackBerry pioneered push notifications and popularized the practice of "thumb typing" using its QWERTY keyboard, something that would become a trademark feature of the line ¶

Purge server cache ¶ Windows Mobile Classic (formerly Pocket PC): devices without an integrated phone... ¶ In 2007, with the advent of Windows Mobile 6.0, Microsoft dropped the name Pocket PC in favor of a new naming scheme: ¶

Pocket PC Previous to this, Palm only produced PDAs running its own Palm OS (as A Pocket PC (P/PC, PPC) is a class of personal digital assistant (PDA) that runs the Windows Mobile operating system, which is based on Windows CE/Windows Embedded Compact, and that has some of the abilities of modern desktop PCs. Windows Smartphone is another Windows CE based platform for non-touch and non-PDA devices. the Treo 700w/wx based on Windows Mobile 5. 0 and featuring integrated telephony. The name was introduced by Microsoft in 2000 as a rebranding of the Palm-size PC category and was marketed until 2007. Some of these devices also had integrated phone and data capabilities, which were known as Pocket PC Phone Edition and are comparable to more modern smartphones ¶

Rockbox ". Rockbox can also retrofit video playback functions on players first released in mid-2000. Retrieved March 12, 2011. Treo8. Retrieved Rockbox is a free and open-source software replacement for the OEM firmware in various forms of digital audio players (DAPs) with an original kernel. Rockbox includes a voice-driven user-interface suitable for operation by visually impaired users. Enhancements include personal digital assistant (PDA) functions, applications, utilities, and games. "~~~~~ROCKBOX for palm pre~~~~~ - Palm Pre/+, Pixi/+, webOS - Pre, Pixi, webOS, Treo - Powered by Discuz. com. It offers an alternative to the player's operating system, in many cases without removing the original firmware, which provides a plug-in architecture for adding various enhancements and functions 91ae7b7991

proposals 91ae7b7991 Updating the message box icons to match the Codex icons 91ae7b7991 In its early years, the BlackBerry proved to be a major advantage over the (typically) one-way communication of conventional pagers and it also removed the... 91ae7b7991

Sony Ericsson P910 The P910 has a full QWERTY keyboard on the back of the flip (the flip can also be removed completely, allowing for a 'traditional' PDA form-factor). and a slightly changed outer casing. It is powered by an ARM9 processor clocked at 156 MHz and runs the Symbian OS with the UIQ graphical user interface. The touchscreen displays 262,144 colours (an 18-bit colour depth), as opposed to the P900's 65,536 (16-bit). The biggest change from the P900 to the P910 is that the P910 supports Memory Stick PRO Duo and the phone's internal memory has been upped from 16 MB to 64 MB. Its closest competitors are the palmOne Treo 650, and the Nokia 9500 Communicator. Other competitors include several The Sony Ericsson P910 is a mobile phone by Sony Ericsson introduced in 2004 and the successor of the Sony Ericsson P900. It comes in three versions:. Although Memory Stick PRO Duo comes in larger capacities, the maximum supported by the P910i is 2 GB 91ae7b7991
