Plastic 1993. 1128/AEM. Microbial Degradation Plastics are a wide range of synthetic or semisynthetic materials composed primarily of polymers. (11): 3695–700. While most plastics are produced from

natural gas and petroleum, a growing minority are produced from renewable resources like polylactic acid. Bibcode:1993ApEnM. Ishtiaq AM (2011). This adaptability, combined with a wide range of other properties such as low weight, durability, flexibility, chemical resistance, low toxicity, and low-cost production, has led to their widespread use around the world. PMID 8285678. 3695-3700. Their defining characteristic, plasticity, allows them to be molded, extruded, or pressed into a diverse range of solid forms. doi:10. 59. 3695C. 59. 11. Copper It is a soft, malleable, and ductile metal with very high thermal and electrical conductivity. confirmed in modern times. The Bronze Age began in Southeastern Europe around 3700–3300 BC, in Northwestern Europe about 2500 BC. A freshly exposed surface of pure copper has a pinkish-orange color. Copper is used as a conductor of heat and electricity, as a building material, and as a constituent of various metal alloys, such as sterling silver used in jewelry, cupronickel used to make marine hardware and coins, and constantan used in strain gauges and thermocouples for temperature measurement. It ended with the beginning Copper is a chemical element; it has symbol Cu (from Latin cuprum) and atomic number 29 29480477a5

IBM Basic assembly language and successors IBM. GC28-6514-9. IBM. IBM The IBM Basic assembly language and successors is a series of assembly languages and assemblers made for the IBM System/360 mainframe system and its successors through the IBM Z. System/360 Operating System Assembler (F) Program Logic (PDF). 1974. 1971. OS Assembler Language, OS Release 21 (PDF). GY26-3700-2 29480477a5

In January 2025, Dell announced its intentions to gradually phase out their existing lineup of computer brands in favor of... 29480477a5  
Copper is one of the few metals that can occur in nature in a directly usable, unalloyed metallic form. This means that copper is a native metal. This led to very early human use in several regions, from c. 8000 BC. Thousands of years later, it was... 29480477a5

Subsequently, an assembly language appeared for the System/360 that had more powerful features and usability, such as support for macros. This language, and the line of assemblers that implemented it, continued to evolve for the... 29480477a5 Idea lab 29480477a5 Miscellaneous 29480477a5 WMF 29480477a5 Between 1950 and 2017, 9.2 billion metric tons of plastic are estimated to have been made, with more than half of this amount being produced since 2004. In 2023 alone, preliminary figures indicate that over 400... 29480477a5

Green Line (MBTA) It is the oldest MBTA subway line, and with tunnel sections dating from 1897, the oldest subway in North America. by December 2021; installation of in-vehicle electronics was scheduled to be complete by September 2023, with wayside installation complete in June 2024 The Green Line is a light rail system run by the Massachusetts Bay Transportation Authority (MBTA) in the Boston, Massachusetts, metropolitan area. With an average daily weekday ridership of 101,000 in 2023, it is among the most heavily used light

rail systems in the country. It runs underground through downtown Boston, and on the surface into inner suburbs via six branches on radial boulevards and grade-separated alignments. The line was assigned the green color in 1967 during a systemwide rebranding because several branches pass through sections of the Emerald Necklace of Boston 29480477a5

Wikipedia:Village pump (technical)/Archive 179 for installation, literally everything else you have to find for yourself (which I found out the hard way): There is mw:Manual:Pywikibot/Installation Village pump 29480477a5

The first of these, the Basic Assembly Language (BAL), is an extremely restricted assembly language, introduced in 1964 and used on 360 systems with only 8 KB of main memory, and only a card reader, a card punch, and a printer for input/output, as part of IBM Basic

Programming Support (BPS/360). The Basic Assembler for BAL was also available as part of Basic Operating System/360 (BOS/360). 29480477a5 Proposals (persistent) 29480477a5 This page contains discussions that have been archived from Village pump (technical). Dell Latitude Inspiron 4000 CPxJ cloned as the Inspiron 3800 CPxH cloned as the Inspiron 3700 The C840 was the last Dell notebook (along with its sister models the Inspiron Dell Latitude is a line of laptop computers manufactured and sold by American company Dell Technologies. The Latitude line directly competes with Acer's Extensa and TravelMate, Asus's ExpertBook, Fujitsu's LifeBook, HP's EliteBook and ProBook, Lenovo's ThinkPad and ThinkBook and Toshiba's Portégé and Tecra. It is a business-oriented line, aimed at corporate enterprises, healthcare, government, and education markets; unlike the Inspiron and XPS series, which were aimed at individual

customers, and the Vostro series, which was aimed at smaller businesses. The "Rugged (Extreme)", "XFR" and "ATG" models compete primarily with Panasonic's Toughbook line of "rugged" laptops 29480477a5
