Engineering destructive tests, nondestructive tests, and stress tests. Modern engineering comprises many subfields which include designing and improving infrastructure, machinery, vehicles, electronics, materials, and energy systems. Testing ensures that products will perform as expected but only in so far as the testing has been Engineering is the practice of using natural science, mathematics, and the engineering design process to solve problems within technology, increase efficiency and productivity, and improve systems 9448b7812f
