Computer art Harry was captured in monochrome from a video camera and digitized into a graphics program called ProPaint. Warhol manipulated the image adding colour by Computer art is art in which computers play a role in the production or display of the artwork. As a result, defining computer art by its end product can thus be difficult. Such art can be an image, sound, animation, video, CD-ROM, DVD-ROM, video game, website, algorithm, performance or gallery installation. Many traditional disciplines are now integrating digital technologies and, as a result, the lines between traditional works of art and new media works created using computers has been blurred. Computer art is bound to change over time since changes in technology and software directly affect what is possible. For instance, an artist may combine traditional painting with algorithm art and other digital techniques 3d19846fb5
