Emergency management While disaster planning is critically important, the plans rarely match the situation exactly, so the plans need to be adapted. The management of disasters tends to require some combination of activity from individuals and households, organizations, local, and/or higher levels of government. For example Emergency management (also Disaster management) is a science and a system charged with creating the framework within which communities reduce vulnerability to hazards and cope with disasters. Instead, emergency management focuses on the management of disasters, which are events that produce more impacts than a community can handle on its own. Although many different terminologies exist globally, the activities. Emergency management, despite its name, does not actually focus on the management of emergencies; emergencies can be understood as minor events with limited impacts and are managed through the day-to-day functions of a community. that appeared 3839576806
