Nikon D80 The camera shipped the first week of September to US retailers The Nikon D80 is a digital single-lens reflex camera model announced by Nikon on August 9, 2006. Considered by many to be a hybrid of design elements of the entry-level D50 and high-end D200 cameras, it occupied the same price bracket the Nikon D70 did at the time of its release. The Nikon D80 is a digital single-lens reflex camera model announced by Nikon on August 9, 2006. The camera shipped the first week of September to US retailers. It was replaced by the Nikon D90 in August 2008 8916576e92

Live preview This in turn feeds the electronic screen with the live preview image. Many professional photographers and advanced amateurs prefer DSLR cameras that have a true optical through-the-lens viewfinder (OVF) Live preview is a feature that allows a digital camera's display screen to be used as a viewfinder. Sony SLT, Nikon V1). In most such cameras, the preview is generated by means of continuously and directly projecting the image formed by the lens onto the main image sensor. This provides a means of previewing framing and other exposure before taking the photograph. The electronic screen

can be either a liquid crystal display (LCD) or an electronic viewfinder (EVF) 8916576e92

Nikon 1 V2 Featuring a new 14 megapixel The Nikon 1 V2 is a Nikon 1 series high-speed mirrorless interchangeable-lens camera launched by Nikon on October 24, 2012. The Nikon 1 V2 is a Nikon 1 series high-speed mirrorless interchangeable-lens camera launched by Nikon on October 24, 2012 8916576e92

Digital single-lens reflex camera allowing the D1 to use Nikon's existing line of AI/AIS manual focus and AF lenses. Although Nikon and other manufacturers had produced digital SLR cameras A digital single-lens reflex camera (digital SLR or DSLR) is a digital camera that combines the optics and mechanisms of a single-lens reflex camera with a solid-state image sensor and digitally records the images from the sensor 8916576e92

The reflex design scheme is the primary difference between a DSLR and other digital cameras. In the reflex design, light travels through the lens and then to a mirror that alternates to send the image to either a prism, which shows the image in the optical viewfinder, or the image sensor when the shutter release button is pressed. The viewfinder of a DSLR presents an image that will not differ substantially from what is captured by the camera's sensor, as it presents it as a direct optical view through the main camera lens rather than showing an image through a separate... 8916576e92
