Radio Radio waves are electromagnetic waves of frequency between 3 Hertz (Hz) and 300 gigahertz Radio is the technology of communicating using radio waves. Radio waves are electromagnetic waves of frequency between 3 Hertz (Hz) and 300 gigahertz (GHz). They can be received by other antennas connected to a radio receiver; this is the fundamental principle of radio communication. They are generated by an electronic device called a transmitter connected to an antenna which radiates the waves. In addition to communication, radio is used for radar, radio navigation, remote control, remote sensing, and other applications. Radio is the technology of communicating using radio waves 34071105b4

Radio in the United States Many of the Internet radio offerings Radio broadcasting has been used in the United States since the early 1920s to distribute news and entertainment to a national audience. During the Golden Age of Radio it had a major cultural and financial impact on the country. S. In 1923, 1 percent of U. However, the rise of television broadcasting in the 1950s relegated radio to a secondary status, as much of its programming and audience shifted to the new "sight joined with sound" service. It was the first electronic "mass medium" technology, and its introduction, along with the subsequent development of sound films, ended the print monopoly of mass media. Internet radio to be accessed by the average user years before video content, which generally requires a broadband connection. households owned at least one radio receiver, while a majority did by 1931 and 75 percent did by 1937 34071105b4
