In 1974, Goldfarb designed SGML and subsequently wrote the first SGML parser, ARC-SGML. SGML facilitates the sharing of machine readable documents for large projects. SGML was used by the military and aerospace, and industrial publishing. Goldfarb continued working to turn SGML into the ISO 8879 standard, and served... 623c799e4d

Where the DOM operates on the document as a whole—building the full abstract syntax tree of an XML document for convenience of the user—SAX parsers operate on each piece of the XML document sequentially, issuing parsing events while making a single pass through the input stream. SAX provides a mechanism for reading data from an XML document that is an alternative to that provided by the Document Object Model (DOM) 623c799e4d

Older markup languages, which typically focus on typography and presentation, include Troff, TeX, and LaTeX. 623c799e4d Processing instructions are exposed in the Document Object Model as Node.PROCESSING_INSTRUCTION_NODE, and they can be used in XPath and XQuery with the 'processing-instruction()' command. 623c799e4d SOAP or Simple Object Access Protocol was created by Mohsen Al-Ghosein, Dave Winer, Bob Atkinson, and Don Box in 1998 with help from Microsoft. 623c799e4d A markup language is a set of rules governing what markup information may be included in a document and how it is combined with the content of the document in a way to facilitate use by humans and computer programs. The idea and terminology evolved from the "marking up" of paper manuscripts (e.g., with revision instructions by editors), traditionally written with a red pen or blue pencil on authors' manuscripts. 623c799e4d In 1969 Charles Goldfarb, leading a small team at IBM, developed the first markup language, called Generalized Markup Language, or GML. Goldfarb coined the term GML, an initialism for the three researchers, Charles Goldfarb, Ed Mosher and Ray Lorie, who worked on the project. 623c799e4d SAAJ enables developers to produce and consume messages conforming to the SOAP 1.1 and 1.2 specifications and SOAP with Attachments note. It can be used as an alternative to JAX-RPC or JAX-WS. 623c799e4d The design goals of XML emphasize simplicity, generality, and usability across the Internet. It is a textual data format with strong support via Unicode for different human languages. Although the design of XML focuses on documents, the language is widely used for the representation of arbitrary data structures, such as those used in web services. 623c799e4d Several schema systems exist to aid in the definition of XML-based languages... 623c799e4d
