Grade inflation is frequently discussed in relation to education in the United States, and to GCSEs and A levels in England and Wales. It is also an issue in many other nations, such as Canada, Australia, New Zealand, France, Germany, South Korea, Japan, China and India. In some countries, teaching young people of school age may be carried out in an informal setting, such as within the family (homeschooling), rather than in a formal setting such as a school or college. The show's pilot and bible was leaked online at 4chan, in April 2024. In the United States of America, grade retention can be used in kindergarten through to third grade; however, students in high school are usually only retained in the specific failed subject. For example, a student can be promoted in a math class but retained in an English class. Most elementary school grades (kindergarten through 5th grade) are taught all subjects in one classroom for the whole day, with exceptions in art and athletics. In these grades, the student who fails or scores below the accepted level in most or all subjects is to be considered for retention. If ultimately retained, the student will then repeat the entire school year's curriculum. Where it is permitted... Although research into mathematics education is primarily concerned with the tools, methods, and approaches that facilitate practice or the study of practice, it also covers an extensive field of study encompassing a variety of different concepts, theories and methods. National and international organisations regularly hold conferences and publish literature in order to improve mathematics education.
