Founded in 1993, the CNSA has pioneered a number of achievements in space for China despite its relatively short history, including becoming the first space agency to land on the far side of the Moon with Chang'e 4, bringing material back from the Moon with Chang'e 5 and 6, and being the second agency who successfully landed a rover on Mars with Tianwen-1. Tianwen-2 is en route to explore the co-orbital near-Earth asteroid 469219 Kamo'oalewa and the active asteroid 311P/PanSTARRS and collecting samples... 3c4c1dca50

Jordaan's contributions to engineering and applied science lie in two main areas: mechanics and probabilistic analysis. His work in mechanics has focused on inelastic, time-dependent and nonlinear behaviour of materials and the related analysis of structural systems. 3c4c1dca50 Scholars are exploring the various reasons for the continued existence of this gender disparity in STEM fields. Those who view this disparity as resulting from discriminatory forces are also seeking ways to redress this disparity within STEM fields (these are typically construed as well-compensated, high-status professions with universal career appeal). 3c4c1dca50
