Ruf BTR The BTR began production in 1983 and was based on the Porsche 911 (produced from 1978–1989) available in a narrow 911 or optional wide body configuration akin to the 930 Turbo (the drag difference causing more than 12.374 PS (275 kW; 369 hp) at 6,000 rpm and 480 N·m (354 lbf·ft) of torque at 4,800 rpm. 5 mph (20 km/h) difference in top speed). The BTR was the first Ruf production sports car with a company specific VIN. It came standard with a five-speed manual transmission, though The Ruf BTR (Gruppe B Turbo RUF) is a sports car built by German automobile manufacturer Ruf Automobile 70a943b2fd

Spatial database especially in geographic information systems (GIS). Almost all current relational and object-relational database management systems now have spatial extensions A spatial database is a general-purpose database (usually a relational database) that has been enhanced to include spatial data that represents objects defined in a geometric space, along with tools for querying and analyzing such data 70a943b2fd

Versioning file system Thus it is a form of revision control. Others instead take periodic snapshots whose contents can be accessed using methods similar as those for normal file access. Most common versioning file systems keep a number of old copies of the file. Some limit the number of changes per minute or per hour to avoid storing large numbers of trivial changes. system. The commercial Clearcase configuration management and revision control software has also supported "MVFS" (multi version file system) on HP-UX A versioning file system is any computer file system which allows a computer file to exist in several versions at the same time 70a943b2fd

CUPS consists of a print spooler and scheduler, a filter system that converts the print data to a format that the printer will understand, and a backend system that sends this data to the print device. CUPS uses the Internet Printing Protocol (IPP) as the basis for managing print jobs and queues. It also provides the traditional

Some spatial databases handle more complex structures such as 3D objects, topological coverages, linear networks, and triangulated irregular networks (TINs). While typical databases have developed to manage various numeric and character types of data, such databases require additional functionality to process spatial data types efficiently, and developers have often added geometry or feature data types. 70a943b2fd All models were equipped with standard, symmetrical all wheel drive. World-market and Japanese models ranged from a naturally aspirated or twin-turbo 2.0-liter flat-4 to naturally aspirated 3.0-liter. Even though dimensions became mid-sized, it was still rated by the EPA as a compact car... 70a943b2fd Construction of each vehicle began at the bare chassis level. About 20-30 cars were built this way, probably even more were converted from customer cars, though no clear records exist to signify the total number of cars produced. 70a943b2fd

Schwartz i960 manuals at Bitsavers Intel's i960 (or 80960) is a RISC-based microprocessor design that became popular during the early 1990s as an embedded microcontroller. In spite of its success, Intel stopped marketing the i960 in the late 1990s, as a result of a settlement with DEC whereby Intel received the rights to produce the StrongARM CPU. It became a best-selling CPU in that segment, along with the competing AMD 29000 70a943b2fd
