History of Kerala The dominion of Cheras was located in one of the key routes of the ancient Indian Ocean trade. The early Cheras collapsed after repeated attacks from the neighboring Cholas and Rashtrakutas. The Cheras transformed Kerala into an international trade centre by establishing trade relations across the Arabian Sea with all major Mediterranean and Red Sea ports as well those of Eastern Africa and the Far East. It was mentioned as one of four independent kingdoms in southern India during Ashoka's time, the others being the Cholas, Pandyas and Satyaputras. the calculus, but many historians still find it impossible to conceive of the problem and its solution in terms of anything other than the calculus and Kerala was first epigraphically recorded as Cheras (Keralaputra) in a 3rd-century BCE rock inscription by the Mauryan emperor Ashoka of Magadha 38fad78078

$$x = \log_2 n \Leftrightarrow 2^x = n.$$
 38fad78078 For example, the binary logarithm of 1 is 0, the binary logarithm of 2 is 1, the binary logarithm of 4 is 2, and the binary logarithm of 32 is 5. 38fad78078

History of logic Greek methods, particularly Aristotelian logic (or term logic) as found in the Organon, found wide application and acceptance in Western science and mathematics for millennia. Formal logics developed in ancient times in India, China, and Greece. Church's system for computation developed into the modern λ -calculus, while the Turing machine became a standard The history of logic deals with the study of the development of the science of valid inference (logic). mathematical problem without an algorithmic solution. The Stoics, especially Chrysippus, began the development of predicate logic 38fad78078

History of mathematics the calculus; but many historians still find it impossible to conceive of the problem and its solution in terms of anything other than the calculus and The history of mathematics deals with the origin of discoveries in mathematics and the mathematical methods and notation of the past. Before the modern age and worldwide spread of knowledge, written examples of new mathematical developments have come to light only in a few locales. From 3000 BC the Mesopotamian states of Sumer, Akkad and Assyria, followed closely by Ancient Egypt and the Levantine state of Ebla began using arithmetic, algebra and geometry for taxation, commerce, trade, and in astronomy, to record time and formulate calendars 38fad78078

The earliest mathematical texts available are from Mesopotamia and Egypt – Plimpton 322 (Babylonian c. 2000 – 1900 BC), the Rhind Mathematical Papyrus (Egyptian c. 1800 BC) and the Moscow Mathematical Papyrus (Egyptian c. 1890 BC). All these texts mention... 38fad78078

George Biddell Airy Figure of the Earth, Precession and Nutation, and Calculus of Variations, to which, in the second edition of 1828, were added tracts on the Planetary Theory Sir George Biddell Airy (; 27 July 1801 – 2 January 1892) was an English mathematician and astronomer, as well as the Lucasian Professor of Mathematics from 1826 to 1828 and the seventh Astronomer Royal from 1835 to 1881. His many achievements include work on planetary orbits, measuring the mean density of the Earth, a method of solution of two-dimensional problems in solid mechanics and, in his role as Astronomer Royal, establishing Greenwich as the location of the prime meridian 38fad78078

History of mathematical notation Notation generally implies a set of well-defined representations of quantities and symbols operators. S. J. A. pp. The history includes Hindu–Arabic numerals, letters from the Roman, Greek, Hebrew, and German alphabets, and a variety of symbols invented by mathematicians over the past several centuries. Mathematical notation comprises the symbols used to write mathematical equations and formulas. 6–108. Thorne (1973) The history of mathematical notation covers the introduction, development, and cultural diffusion of mathematical symbols and the conflicts between notational methods that arise during a notation's move to popularity or obsolescence. Tensor Calculus. Misner; K. ; Schild A. Wheeler; C. first Dover Publications 1978 edition. (1949). Kaluza–Klein theory. L. Synge J 38fad78078

It is concerned with managing an entire production system that converts inputs (in the forms of raw materials, labor, consumables, and energy) into outputs (in the form of goods and services for consumers). Operations management covers sectors like banking systems, hospitals, companies, working with suppliers, customers, and using technology. Operations is one of the major functions in an

organization along with supply chains, marketing, finance and human resources. The operations function requires management of both the strategic and day-to-day production of goods and services. 38fad78078

Ancient Greek mathematics The development of mathematics as a theoretical discipline and the use of deductive reasoning in proofs is an important difference between Greek mathematics and those of preceding civilizations. Greek mathematicians lived in cities spread around the shores of the ancient Mediterranean, from Anatolia to Italy and North Africa, but were united by Greek culture and the Greek language. mathematical physics, and, at times, approached ideas close to the integral calculus. Richard Dedekind acknowledged Eudoxus's theory of proportion as an inspiration Ancient Greek mathematics refers to the history of mathematical ideas and texts in Ancient Greece during classical and late antiquity, mostly from the 5th century BC to the 6th century AD 38fad78078

2 38fad78078 This period is traditionally understood to have begun during the reign of the Abbasid caliph Harun al-Rashid (786 to 809) with the inauguration of the House of Wisdom, which saw scholars from all over the Muslim world flock to Baghdad, the world's largest city at the time, to translate the known world's classical knowledge into Arabic and Persian. The period is traditionally said to have ended with the collapse of the Abbasid caliphate due to Mongol invasions and the Siege of Baghdad in 1258. 38fad78078 = 38fad78078 In managing manufacturing... 38fad78078 = 38fad78078
