On an everyday basis, bones will support many kinds of forces naturally applied to them, but when the forces are too strong, the bones will break. For example, when an adolescent jumps off a trampoline and lands on their feet, the bones and connective tissue in the adolescent's feet will usually absorb the force, flex, then return to their original shape. However, if the adolescent lands and the force is too strong, the bones and the connective tissue will not be able to support the force and will fracture. Brennan is loosely based on author Kathy Reichs. Her name originates from the heroine in Reichs's crime novel series, also named Temperance Brennan. The main similarity the two share is their occupation as forensic anthropologists. Brennan appeared in Comcast's list of TV's Most Intriguing Characters. She was included in AfterEllen.com's Top 50 Favorite Female TV Characters. Her relationship with Seeley Booth was listed in Entertainment Weekly's "30 Best 'Will They/Won't They?' TV Couples".

Child bone fracture About 15% of all injuries in children are fracture injuries. Bone fractures in children are different from adult bone fractures because a child's bones are still growing. Also, more consideration needs to be taken when a child fractures a bone since it will affect the child in their growth. For example, when an adolescent jumps off a trampoline and lands on their feet, the bones and connective tissue are too strong, the bones will break
