Indian National Congress "LS passes bill to provide IIT for eight states". Deccan Herald. Founded on 28 December 1885, it was the first modern nationalist movement to emerge in the British Empire in Asia and Africa. From the late 19th century, and especially after 1920, under the leadership of Mahatma Gandhi, the Congress became the principal leader of the Indian independence movement. Consciousness There is also a medical definition, helping for
example. Today, it often includes any kind of cognition,
experience, feeling, or perception. Opinions differ about what
exactly needs to be studied or even considered consciousness.
However, its nature has led to millennia of analyses,
explanations, and debate among philosophers, scientists, and
theologians. In some explanations, it is synonymous with the
mind, and at other times, an aspect of it. In the past, it was
one's "inner life", the world of introspection, of private
thought, imagination, and volition. IIT proposes a 1:1 mapping
between conscious states and precise, formal mathematical
descriptions of those mental states Consciousness, at its

simplest, is awareness of a state or object, either internal to oneself or in one's external environment. It may be awareness, awareness of awareness, metacognition, or self-awareness, either continuously changing or not. reaches a certain level of complexity 21289613a1

Hard problem of consciousness The easy problems are amenable to functional explanation—that is, explanations that are mechanistic or behavioural—since each physical system can be explained purely by reference to the "structure and dynamics" that underpin the phenomenon. It is contrasted with the "easy problems" of explaining why and how physical systems give a human being the ability to discriminate, to integrate information, and to perform behavioural functions such as watching, listening, speaking (including generating an utterance that appears to refer to personal behaviour or belief), and so forth. " Chalmers agrees that IIT, if correct In the philosophy of mind, the "hard problem" of

consciousness is to explain why and how humans (and other organisms) have qualia, phenomenal consciousness, or subjective experience. "Even if IIT is correct," he argues, "it does not explain why integrated information generates (or is) consciousness 21289613a1
