Flood geology In the 20th century, young-Earth creationists revived flood geology as an overarching concept in their opposition to evolution, assuming a recent six-day Creation and cataclysmic geological changes during the biblical flood, and incorporating creationist explanations of. In the summer of 1827 Sedgwick and Roderick Murchison travelled to investigate the geology of the Scottish Highlands, where Flood geology (also creation geology or diluvial geology) is a pseudoscientific attempt to interpret and reconcile geological

features of the Earth in accordance with a literal belief in the Genesis flood narrative, the flood myth in the Hebrew Bible. In the early 19th century, diluvial geologists hypothesized that specific surface features provided evidence of a worldwide flood which had followed earlier geological eras; after further investigation they agreed that these features resulted from local floods or from glaciers. Prévost "lectured against it"
