

Sustainable Development National Aspirations Local Implementation

Capacity building Target Capacity building (or capacity development, capacity strengthening) is the improvement in an individual's or organization's facility (or capability) "to produce, perform or deploy". places: Sustainable Development Goal 17 is to "Strengthen the means of implementation and revitalize the Global Partnership for Sustainable Development". Since the 1950s, international organizations, governments, non-governmental organizations (NGOs) and communities use the concept of capacity building as part of "social and economic development" in national and subnational plans. The United Nations Development Programme defines itself by "capacity development" in the sense of "how UNDP works" to fulfill its mission. The UN system applies it in almost every sector, including. The terms capacity building and capacity development have often been used interchangeably, although a publication by OECD-DAC stated in 2006 that capacity development was the preferable term

In January 2013, the 30-member UN General Assembly Open Working Group on Sustainable Development Goals was established to identify specific goals for the SDGs. The Open Working Group (OWG) was tasked with preparing a proposal on the SDGs for consideration during the 68th session of the General Assembly, September 2013 – September 2014. On 19 July 2014, the OWG forwarded a proposal for the SDGs to the Assembly. After 13 sessions, the OWG submitted their proposal of 8 SDGs and 169 targets to the 68th session of the General Assembly in September 2014. On 5 December 2014, the UN General... These goals are ambitious, and the reports and outcomes to date indicate a challenging path. Most, if not all, of the goals are unlikely to be met by 2030. Rising inequalities, climate change, and biodiversity loss are topics of concern threatening progress. The COVID-19 pandemic...

Post-2015 Development Agenda Nations, the Post-2015 Development Agenda was a set of talks and discussions that led to the creation of the 2016 Sustainable Development Goals. This replaced the 2015 Millennium Development Goals. This replaced In the United Nations, the Post-2015 Development Agenda was a set of talks and discussions that led to the creation of the 2016 Sustainable Development Goals

Sustainability measurement These include the UN Human Development Index and ecological footprints. track sustainable development. They also involve indices and accounting. The metrics are used over a wide range of spatial and temporal scales. They include sustainability standards and certification systems like Fairtrade and Organic. They include indicators, benchmarks and audits. To measure sustainability, frameworks and indicators consider environmental, social and economic domains. They can include assessment, appraisal and other reporting systems. Two related concepts for sustainability measurement Sustainability measurement is a set of frameworks or indicators used to measure how sustainable something is. This includes processes, products, services and businesses. Sustainability is difficult to quantify and it may even be impossible to measure as there is no fixed definition. For organizations, sustainability measures. The metrics vary by use case and are still evolving 792d46ed02

Sustainable consumption can be undertaken in such a way that needs are met for present-day humans and also for future generations. Sustainable consumption is often paralleled with sustainable production; consumption refers to use and disposal (or recycling) not just by individuals and households, but also by governments, businesses, and other organizations. Sustainable consumption is closely related to sustainable production and sustainable lifestyles. "A sustainable lifestyle minimizes ecological impacts while enabling a flourishing life for individuals, households, communities, and beyond. It is the product of individual and collective decisions about... 792d46ed02

Sustainable Development Goals (SDGs) The 2030 Agenda for Sustainable Development, adopted by all United Nations (UN) members in 2015, created 17 world Sustainable Development Goals (abbr. The aim of these global goals is "peace and prosperity for people and the planet" - while tackling climate change and working to preserve oceans and forests. 2030 Agenda for Sustainable Development, adopted by all United Nations (UN) members in 2015, created 17 world Sustainable Development Goals (abbr. The SDGs highlight the connections between the environmental, social and economic aspects of sustainable development. SDGs). Sustainability is at the center of the SDGs, as the term sustainable development implies 792d46ed02

The term has been used frequently in the 20th and 21st centuries, but the concept has existed in the West for far longer. "Modernization", "Westernization", and especially "industrialization" are other terms often used while discussing economic development. Historically, economic development policies focused on industrialization and infrastructure; since the 1960s, it has increasingly focused on poverty reduction. 792d46ed02
