"Puget Sound has biological resources which include all of the living organisms which inhabit the marine waters and shorelines. These biological resources are plankton, invertebrates, fish, birds, mammals, and aquatic vegetation, including species that are either residential or migratory." bdc b16f4f7 The ninth Puget Sound Update, from the Puget Sound Action Team reports that: bdc b16f4f7

Reuse of human excreta Beneficial uses of the treated excreta may focus on using the plant-available nutrients (mainly nitrogen, phosphorus and potassium) that are contained in the treated excreta. The intended reuse applications for the nutrient content may include: soil conditioner or fertilizer in agriculture or horticultural activities. Other reuse applications, which focus. They may also make use of the organic matter and energy contained in the excreta. To a lesser extent, reuse of the excreta's water content might also take place, although this is better known as water reclamation from municipal wastewater. World Health Organization Guidelines from 2006 Reuse of human excreta is the safe, beneficial use of treated human excreta after applying suitable treatment steps and risk management approaches that are customized for the intended reuse application. However, this practice is often carried out in an unregulated and unsafe manner in developing countries bdc b16f4f7

The University of the Philippines was originally established by the American colonial government on June 18, 1908, through the enactment of Act No. 1870 by the First Philippine Legislature. It was envisioned as the country’s premier institution for higher learning with a mandate to provide "advanced instruction in literature, philosophy, the sciences, and the arts and to give professional and technical training," regardless of "age, sex, nationality, religious belief, or political affiliation." bdc b16f4f7
