A computer participating in networks that use the Internet protocol suite may also be called an IP host. Specifically, computers participating in the Internet are called Internet hosts. Internet hosts and other IP hosts have one or more IP addresses assigned to their network interfaces. The addresses are configured either manually by an administrator, automatically at startup by means of the Dynamic Host Configuration Protocol (DHCP), or by stateless address autoconfiguration methods.

Digital signal processing In digital electronics, a digital signal is represented as a pulse train, which is typically generated by the switching of a transistor.

Schuler: Digital Signal Digital signal processing (DSP) is the use of digital processing, such as by computers or more specialized digital signal processors, to perform a wide variety of signal processing operations. The digital signals processed in this manner are a sequence of numbers that represent samples of a continuous variable in a domain such as time, space, or frequency.

Kidney belts are often worn by weightlifters, and, sometimes, by manual laborers and medical patients. They are also used by motorcyclists, especially offroad riders and those engaged in long-distance motorcycle riding, to support the lower back, and to guard against wind chill. Stuttgart physician Peter Falb has stated that the support provided for motorcyclists is purely psychological; kidneys are naturally strongly supported to the rest of the body. e7ae28d91f
