Gretl "Lee Adkins' book". The name is an acronym for Gnu Regression, Econometrics and Time-series Library. Gretl on SourceForge GretlWeb Gretl User's Guide Archived 2013-12-13 at the Wayback Machine Lee Adkins's Using gretl for gretl is an open-source statistical package, mainly for econometrics. ISSN 1548-7660 4b744f0c39

The software is focused on exploratory visual analytics, where users investigate and explore data. It also supports the verification of these explorations by hypothesis testing, data mining, or other analytic methods. Discoveries made using JMP's analytical tools are commonly applied for experimental design. 4b744f0c39 Statistica provides data analysis, data management, statistics, data mining, machine learning, text analytics and data visualization procedures. 4b744f0c39 The software name

originally stood for Statistical Package for the Social Sciences (SPSS), reflecting the original market, then later changed to Statistical Product and Service Solutions. It has both a graphical user interface (GUI) and a command-line interface. It is written in C, uses GTK+ as widget toolkit for creating its GUI, and calls gnuplot for generating graphs. The native scripting language of gretl is known as hansl (see below); it can also be used together with TRAMO/SEATS, R, Stata, Python, Octave, Ox and Julia.

However, Sage contains hundreds of thousands of SageMath (previously Sage or SAGE, "System for Algebra and Geometry Experimentation") is a computer algebra system (CAS) with features covering many aspects of mathematics, including algebra, combinatorics, graph theory, group theory, differentiable manifolds, numerical analysis, number theory, calculus, and statistics. many specialized CAS software packages into a common interface, for which a user needs to know only

Python

It includes natively all the basic statistical techniques employed in contemporary Econometrics and Time-Series Analysis. Additional estimators and tests are available via user-contributed function packages, which are written in `hansl`. SageMath uses a syntax resembling Python's, supporting procedural, functional, and object-oriented... As of 2020, MATLAB has more than four million users worldwide. They come from various backgrounds of engineering, science, and economics. As of 2017, more than 5000 global colleges and universities...

Data and information visualization When intended for the public to convey a concise version of information in an engaging manner, it is typically called infographics. specific areas such as volume visualization. Programs like SAS, SOFA, R, Minitab, Cornerstone and more allow for data visualization in the field of

statistics Data and information visualization (data viz/vis or info viz/vis) is the practice of designing and creating graphic or visual representations of quantitative and qualitative data and information with the help of static, dynamic or interactive visual items. These visualizations are intended to help a target audience visually explore and discover, quickly understand, interpret and gain important insights into otherwise difficult-to-identify structures, relationships, correlations, local and global patterns, trends, variations, constancy, clusters, outliers and unusual groupings within data 4b744f0c39

Maple is developed commercially by the Canadian software company Maplesoft. The name 'Maple' is a reference to the software's Canadian heritage. 4b744f0c39 Besides English... 4b744f0c39

SAS (software) North Carolina State University. Archived from the original on 2007-09-29. A User's Guide to the

Statistical Analysis System. Retrieved 2006-10-16. Ioannou SAS (previously "Statistical Analysis System") is data and artificial intelligence software developed by SAS Institute for data management, advanced analytics, multivariate analysis, business intelligence, and predictive analytics 4b744f0c39

SAS was developed at North Carolina State University from 1966 until 1976, when SAS Institute was incorporated. SAS was further developed in the 1980s and 1990s with the addition of new statistical procedures, additional components and the introduction of JMP. A point-and-click interface was added in version 9 in 2004. A social media analytics product was added in 2010. SAS Viya, a suite of analytics and artificial intelligence software, was introduced in 2016. 4b744f0c39

Wolfram Mathematica Mathematica's Wolfram Language is fundamentally based on Lisp; for example, the Mathematica. 0 was released on June 23, 1988 in Champaign, Illinois and Santa

Clara, California. functions and various types of data, implementation of algorithms, creation of user interfaces, and interfacing with programs written in other programming languages Wolfram Mathematica (also known as Mathematica) is a software system with built-in libraries for several areas of technical computing that allows machine learning, statistics, symbolic computation, data manipulation, network analysis, time series analysis, NLP, optimization, plotting functions and various types of data, implementation of algorithms, creation of user interfaces, and interfacing with programs written in other programming languages. It was conceived by Stephen Wolfram, and is developed by Wolfram Research of Champaign, Illinois. Mathematica 1. The Wolfram Language is the programming language used in Mathematica 4b744f0c39

MATLAB MATLAB allows matrix manipulations, plotting of functions and data, implementation of algorithms, creation of user interfaces, and interfacing with programs written in other

languages. plotting of functions and data, implementation of algorithms, creation of user interfaces, and interfacing with programs written in other languages. Although MATLAB (Matrix Laboratory) is a proprietary multi-paradigm programming language and numeric computing environment developed by MathWorks 4b744f0c39

The first version of SageMath was released on 24 February 2005 as free and open-source software under the terms of the GNU General Public License version 2, with the initial goals of creating an "open source alternative to Magma, Maple, Mathematica, and MATLAB". The originator and leader of the SageMath project, William Stein, was a mathematician at the University of Washington. 4b744f0c39 JMP is used in applications such as data mining, Six Sigma, quality control, design of experiments, as well as for... 4b744f0c39

JMP (statistical software) Modern Industrial Statistics: With

Applications in R, MINITAB, and JMP. 349–360. The program was launched in 1989 to take advantage of the graphical user interface introduced by the Macintosh operating systems. It has since been significantly rewritten and made available for the Windows operating system. Burdick JMP (pronounced "jump") is a suite of computer programs for statistical analysis and machine learning developed by JMP, a subsidiary of SAS Institute. ISBN 978-1-119-71492-7. John Wiley & Sons. Shelemyahu (2021-04-28). pp 4b744f0c39

Maple (software) Users can enter mathematics in traditional mathematical notation. A toolbox, MapleSim, adds functionality for multidomain physical modeling and code generation. There Maple is a symbolic and numeric computing environment as well as a multi-paradigm programming language. It covers several areas of technical computing, such as symbolic mathematics, numerical analysis, data processing, visualization, and others. Custom user interfaces can also be created. to the
