Food and Drug Administration phones, airport baggage screening equipment, television receivers, microwave ovens, tanning booths, and laser products. CDRH regulatory powers include The United States Food and Drug Administration (FDA or US FDA) is a federal agency of the Department of Health and Human Services. The FDA is responsible for protecting and promoting public health through the control and supervision of food safety, tobacco products, caffeine products, dietary supplements, prescription and over-the-counter pharmaceutical drugs (medications), vaccines, biopharmaceuticals, blood transfusions, medical devices, electromagnetic radiation emitting devices (ERED), cosmetics, animal foods & feed and veterinary products

Timeline of United States inventions (1890–1945) Cooking food with microwaves was discovered by Percy A timeline of United States inventions (1890–1945) encompasses the innovative advancements of the United States within a historical context, dating from the Progressive Era to the end of World War II, which have been achieved by inventors who are either native-born or naturalized citizens of the United States. 1945 Microwave oven A microwave oven cooks or heats food by dielectric heating. Copyright protection secures a person's right to the first-to-invent claim of the original invention in question, highlighted in Article I, Section 8, Clause 8 of the United States Constitution which gives the following enumerated power to the United States Congress:. continues to this day

Radar It is a radiodetermination method used to detect and track aircraft, ships, spacecraft, guided missiles, and motor vehicles, and map weather formations and terrain. Harford, Radar is a system that uses radio waves to determine the distance (ranging), direction (azimuth and elevation angles), and radial velocity of objects relative to the site. remains the key piece of technology that lies at the heart of your microwave oven today. The cavity magnetron's invention changed the world. The term radar has since entered English and other languages as an anacronym, a common noun, losing all capitalization. The term RADAR was coined in 1940 by the United States Navy as an acronym for "radio detection and ranging"

Reliability engineering Reliability is defined as the probability that a product, system, or service will perform its intended function adequately for a specified period of time; or will operate in a defined environment without failure. Reliability is closely related to availability, which is typically described as the ability of a component or system to function at a specified moment or interval of time. Communications systems began to Reliability engineering is a sub-discipline of systems engineering that emphasizes the ability of equipment to function without failure. air conditioning systems developed electronic controllers, as did microwave ovens and a variety of other appliances

A radar system consists of a transmitter producing electromagnetic waves in the radio or microwave domain, a transmitting antenna, a receiving antenna (often the same antenna is used for transmitting and receiving) and a receiver and processor... In 1641, the first patent in North America was...

English cuisine "Pub grub" expanded to include British food items English cuisine encompasses the cooking styles, traditions and recipes associated with England. Quality dropped but variety increased with the introduction of microwave ovens and freezer food. Withington. It has distinctive attributes of its own, but is also very similar to wider British cuisine, partly historically and partly due to the import of ingredients and ideas from the Americas, China, and India during the time of the British Empire and as a result of post-war immigration

Some traditional meals, such as bread and cheese, roasted and stewed meats, meat and game pies, boiled vegetables and broths, and freshwater and saltwater fish have ancient origins. The 14th-century English cookbook, the *Forme of Cury*, contains recipes for these, and dates from the royal court of Richard II.

List of Japanese inventions and discoveries Sensor microwave oven — In 1979, Sharp introduced the first microwave oven incorporating sensor and microcomputer technology. Japanese pioneers have made contributions across a number of scientific, technological and art domains. Microwave oven smart device This is a list of Japanese inventions and

discoveries. In particular, Japan has played a crucial role in the digital revolution since the 20th century, with many modern revolutionary and widespread technologies in fields such as electronics and robotics introduced by Japanese inventors and entrepreneurs 2a293fcaef

The history of pubs can be traced to taverns in Roman Britain, and through Anglo-Saxon alehouses, but it was not until the early 19th century that... 2a293fcaef has at least one indoor area not laid out for meals 2a293fcaef The FDA's primary focus is enforcement of the Federal Food, Drug, and Cosmetic Act (FD&C). However, the agency also enforces other laws, notably Section 361 of the Public Health Service Act as well as associated regulations. Much of this regulatory-enforcement... 2a293fcaef The "New Labour" premiership of Tony Blair (1997–2007) accepted many of Thatcher's economic policies, but he presided over a period of relative economic prosperity. Hong Kong, the most prosperous and the last significant overseas territory was handed back to China in 1997, ending 156 years of British rule and the symbolic end... 2a293fcaef Hard disk drives were introduced by IBM in 1956, and were the dominant secondary storage device... 2a293fcaef

Northern Pacific Railway , during the last years of the American Civil War (1861-1865), and received nearly 40 million acres (62,000 sq mi; 160,000 km2) of adjacent land grants, which it used to raise additional money in Europe (especially in President Henry Villard's home country of the new German Empire), for construction funding. He contracted to purchase as many potatoes as the farmers could produce The Northern Pacific Railway (reporting mark NP) was an important American transcontinental railroad that operated across the northern tier of the Western United States, from Minnesota to the Pacific Northwest between 1864 and 1970. C. It was approved and chartered by the 38th Congress of the United States in the national / federal capital of Washington, D. discovered the "inedible" potatoes were delicious after baking in a slow oven 2a293fcaef

serves draught beer or cider without requiring food be consumed 2a293fcaef allows drinks to be bought at a bar (i.e., not only table service) 2a293fcaef The reliability function is theoretically defined as the probability of success. In practice, it is calculated using different techniques, and its value ranges between 0 and 1, where 0 indicates no probability of success while 1 indicates definite success. This probability is estimated... 2a293fcaef is open to the public without membership or residency 2a293fcaef

Hard disk drive and introduced the "drive in a drawer" layout, sometimes called the "pizza oven", although the "drawer" was not the complete drive. Into the 1970s, HDDs A hard disk drive (HDD), hard disk, hard drive, or fixed disk is an electro-mechanical data storage device that stores and retrieves digital data using magnetic storage with one or more rigid rapidly rotating platters coated with magnetic material. The platters are paired with magnetic heads, usually arranged on a moving actuator arm, which read and write data to the platter surfaces. HDDs are a type of non-volatile storage, retaining stored data when powered off. Data is accessed in a random-access manner, meaning that individual blocks of data can be stored and retrieved in any order. Modern HDDs are typically in the form of a small rectangular box, possible in a disk enclosure for portability 2a293fcaef
