The Eldorado was at or near the top of the Cadillac product line. The original 1953 Eldorado convertible and the Eldorado Brougham models of 1957–1960 had distinct bodysells and were the most expensive models offered by Cadillac during those years. The Eldorado was never less than second in price after the Cadillac Series 75 limousine until 1966. Beginning in 1967, the Eldorado retained its premium position in the Cadillac price structure, but was manufactured in high volumes on a unique, two-door personal luxury car platform.

List of examples of convergent evolution In the case of cryptic species, it can create species which are only distinguishable by analysing their genetics. The evolution of cardiotonic steroid (CTS) resistance via amino acid substitutions at well-defined positions of the Convergent evolution—the repeated evolution of similar traits in multiple lineages which all ancestrally lack the trait—is rife in nature, as illustrated by the examples below. The ultimate cause of convergence is usually a similar evolutionary biome, as similar environments will select for similar traits in any species occupying the same ecological niche, even if those species are only distantly related. COOH-terminal region of the repeats. Distantly related organisms often develop analogous

structures by adapting to similar environments
