A single Star Destroyer could project considerable influence over a star system in the name of the Empire: each can be deployed individually as both a forward operating base and as mobile weapon systems platform responsible for safeguarding multiple planets, trade routes, and systems, and carried enough firepower to subdue an entire planetary system or annihilate a small rebel fleet. 52021f76d0 The Star Wars universe showcases a diversity of vehicle types, many of which utilize fictitious technology. One of these, the repulsorlift, is an anti-gravity device that pushes against a planet's gravity to create lift. Vehicles which use repulsorlifts to hover and fly are known as 'repulsorcraft' or 'speeders' with further classifications including airspeeders, landspeeders, snowspeeders and speeder bikes. Traditional methods of locomotion like wheels and tracked treads still see use however as they are typically more durable and require less energy to operate.
