Ground support equipment This equipment is used to service the aircraft between flights. As the name suggests, ground support equipment is there to support the operations of aircraft whilst on the ground. This equipment Ground support equipment (GSE) is the support equipment found at an airport, usually on the apron, the servicing area by the terminal. Ground support equipment (GSE) is the support equipment found at an airport, usually on the apron, the servicing area by the terminal. The role of this equipment generally involves ground power operations, aircraft mobility, and cargo/passenger loading operations ef13d36cf4

Many airlines subcontract ground handling to an airport or a handling agent, or even to

another airline. Ground handling addresses the many service requirements of a passenger aircraft between the time it arrives at a terminal gate and the time it departs for its next flight. Speed, efficiency, and accuracy are important in ground handling services in order...
