Ice cream A Roman cookbook dating back to the 1st century includes recipes for sweet desserts that Ice cream is a frozen dessert

typically made from milk or cream that has been flavoured with a sweetener, either sugar or an alternative, and a spice, such as cocoa or vanilla, or with fruit, such as strawberries or peaches. It can also be made by whisking a flavoured cream base and liquid nitrogen together. Food colouring is sometimes added in addition to stabilizers. It becomes more malleable as its temperature increases. The result is a smooth, semi-solid foam that is solid at very low temperatures (below 2 °C or 35 °F). The mixture is cooled below the freezing point of water and stirred to incorporate air spaces and prevent detectable ice crystals from forming. sources say the history of ice cream begins in Persia in 550 BC 0b895cba17
