Commercial revolution role in world financial developments, devising the main instruments and practices of banking and the emergence of new forms of social and economic organization In European history, the commercial revolution saw the development of a European economy - based on trade - which began in the 11th century AD and operated until the advent of the Industrial Revolution in the mid-18th century. Consumer demand fostered more trade, and trade expanded in the second half of the Middle Ages (roughly 1000 to 1500 AD). Newly forming European states, through voyages of discovery, investigated alternative trade routes in the 15th and 16th centuries, which allowed European powers to build vast, new international trade networks. Nations also sought new sources of wealth and practiced mercantilism and colonialism. 1100 with the Crusades, Europeans rediscovered spices, silks, and other commodities then rare in Europe. The Commercial Revolution is marked. Beginning c 4e0d05aaea
