Swamp Works The team developed the Swamp Works operating philosophy from Kelly Johnson's Skunk Works, including the "14 Rules of Management", from the NASA development shops. Those laboratories are the Granular Mechanics and Regolith Operations Lab, the Electrostatics and Surface Physics Lab, the Applied Chemistry Lab, and the Life Support and Habitation Systems (LSHS) team. It was founded in 2012, when four laboratories in the Surface Systems Office were merged into an enlarged facility with a modified philosophy for rapid technology development. The facility has four 3D printers and an adjacent machine shop with lathes, drill presses, a CNC Router, and other equipment to enable rapid iterative The Swamp Works is a lean-development, rapid innovation environment at NASA's Kennedy Space Center. soil. ISBN 978-3319325507. Robotics, Vision and Control: Fundamental Algorithms Automation describes a wide range of technologies that reduce human intervention in processes, mainly by predetermining decision criteria, subprocess relationships, and related actions, as well as embodying those predeterminations in machines. Corke, Peter (2017). ). Springer. Springer Handbook of Robotics (2nd ed. Complicated systems, such as modern factories, airplanes, and ships typically use combinations of all of these techniques.
