

Biochemical Engineering Fundamentals By Bailey And Ollis Pdf

Industrial fermentation F. (2006). March 2024. E. ; Ollis, D. Biochemical Engineering Fundamentals (2nd ed. New York: McGraw Hill Publication Industrial fermentation is the intentional use of fermentation in manufacturing processes. Retrieved 12 December 2024. In addition to the mass production of fermented foods and drinks, industrial fermentation has widespread applications in chemical industry. Moreover, nearly all commercially produced industrial enzymes, such as lipase, invertase and rennet, are made by fermentation with genetically modified microbes. Bailey, J.). Commodity chemicals, such as acetic acid, citric acid, and ethanol are made by fermentation. In some cases, production of biomass itself is the objective, as is the case for single-cell proteins, baker's yeast, and starter cultures for lactic acid bacteria used in cheesemaking 28b254484a
