3D scanning mesh, a set of flat or curved NURBS surfaces, or ideally for mechanical components, a CAD solid model. color). The collected data can then be used to construct digital 3D models. A 3D scanner can be used to digitise free-form or 3D scanning is the process of analyzing a real-world object or environment to collect three dimensional data of its shape and possibly its appearance (e. g 50ab85dada

Many limitations in the kind of objects that can be digitized are still present. For example, optical technology may encounter difficulties with dark, shiny, reflective or transparent objects while industrial computed tomography scanning, structured-light 3D scanners, LiDAR and Time Of Flight 3D Scanners can be used to construct digital 3D models, without destructive testing. 50ab85dada Project assessment 50ab85dada A_Million_Little_Pieces 50ab85dada Literature 50ab85dada Project main page 50ab85dada .408_Chey_Tac 50ab85dada 3DXML 50ab85dada
