In the 19th century it had become clear that electricity and magnetism were related, and their theories were unified: wherever charges are in motion electric current results, and magnetism is due to electric current. The source for electric field is electric charge, whereas that for magnetic field... ad9385a73f

History of electromagnetic theory People then had little understanding of electricity, and were unable to explain the phenomena. The history of electromagnetic theory begins with ancient measures to understand atmospheric electricity, in particular lightning. Scientific understanding and research into the nature of electricity grew throughout the eighteenth and nineteenth centuries through the work of researchers such as André-Marie Ampère, Charles-Augustin de Coulomb, Michael Faraday, Carl Friedrich Gauss and James Clerk Maxwell. solution for this problem known at the time, it appeared that a
