Project-based learning replaces other traditional models of instruction such as lectures, textbook-workbook-driven activities and inquiry as the preferred delivery method for key Project-based learning is a teaching method that involves a dynamic classroom approach in which it is believed that students acquire a deeper knowledge through active exploration of real-world challenges and problems. Students learn about a subject by working for an extended period of time to investigate and respond to a complex question, challenge, or problem. It is a style of active learning and inquiry-based learning. Project-based learning contrasts with paper-based, rote memorization, or teacher-led instruction that presents established facts or portrays a smooth path to knowledge by instead posing questions, problems,

or scenarios f330285723

Bahá'í teaching plans From 1964 to 2000, there were six international Bahá'í teaching plans of varying lengths. Starting with a one-year plan from 2021 to 2022 The leadership of the Bahá'í Faith has created goal-oriented Bahá'í teaching plans, spanning 1–10 years each, to spread the Bahá'í Faith. Shoghi Effendi initiated the plans before his death in 1957, and the Universal House of Justice has initiated the plans since 1964. The plans began in the 1930s and 1940s as teaching goals for certain countries and in 1953 became coordinated globally, often with a focus on sending travelling teachers to new countries. and a systematic study known as “study circles”, based on a series of workbooks by the Ruhi Institute f330285723
