DNA and ribonucleic acid (RNA) are nucleic acids. Alongside proteins, lipids and complex carbohydrates (polysaccharides), nucleic acids are one of the four major types of macromolecules that are essential for all known forms of life. The polymer carries genetic instructions for the development, functioning, growth and reproduction of all known organisms and many viruses

String theory On distance scales larger than the string scale, a string acts like a particle, with its mass, charge, and other properties determined by the vibrational state of the string. “Mirror principle, II”. 3: 109–146. Thus, string theory is a theory of quantum gravity. arXiv:math/9905006 In physics, string theory is a theoretical framework in which the point-like particles of particle physics are replaced by one-dimensional objects called strings. Lian, Bong; Liu, Kefeng; Yau, Shing-Tung (1999a). a5. In string theory, one of the many vibrational states of the string corresponds to the graviton, a quantum mechanical particle that carries the gravitational force. Asian Journal of Mathematics. S2CID 8035522. n4. String theory describes how these strings propagate through space and interact with each other
