Ship model basin For this, the self-propelled model is exposed A ship model basin is a basin or tank used to carry out hydrodynamic tests with ship models, for the purpose of designing a new (full sized) ship, or refining the design of a ship to improve the ship's performance at sea. The towing tank also serves to determine the maneuvering behaviour in model scale. shipyard and ship owner. It can also refer to the organization (often a company) that owns and operates such a facility 21dc8f7701

Rotating detonation engine Computational simulations and experimental results have shown that the RDE has potential in transport and other applications. Center used simulations in computational fluid dynamics (CFD) to assess the RDE's detonation frame of reference and compare performance with the PDE. He found A rotating detonation engine (RDE) uses a form of pressure gain combustion, where one or more detonations continuously travel around an annular channel 21dc8f7701
