Number for more than 2000 years and have led to many questions, only some of which have been answered. The most basic examples are the natural numbers 1, 2, 3, 4, and so forth. The study of these questions belongs to number theory A number is a mathematical object used to count, measure, and label. As only a relatively small number of symbols can be memorized, basic numerals are commonly arranged in a numeral system, which is an organized way to represent any number. Individual numbers can be represented in language with number words or by dedicated symbols called numerals; for example, "five" is a number word and "5" is the corresponding numeral. In addition to their use in counting and measuring, numerals are often used for labels (as with telephone. The most common numeral system is the Hindu-Arabic numeral system, which allows for the representation of any non-negative integer using a combination of ten fundamental numeric symbols, called digits
