The sum of proper divisors of a number is called its aliquot sum, so a perfect number is one that is equal to its aliquot sum. Equivalently, a perfect number is a number that is half the sum of all of its positive divisors; in symbols, $\sigma(n) = 2n$. 3480287429 (3480287429 Crick and Watson's paper in Nature in 1953 laid the groundwork for understanding DNA structure and functions. Together with Maurice Wilkins, they were jointly awarded the 1962 Nobel Prize in Physiology or Medicine "for their discoveries concerning the molecular structure of nucleic acids and its significance for information transfer in living material". 3480287429 – 3480287429 The artefact was among wreckage retrieved from a shipwreck off the coast of the Greek island Antikythera in 1901. In 1902, during a visit to the National Archaeological Museum in Athens, it was noticed by Greek politician Spyridon Stais as containing a gear, prompting the first study of the fragment by his cousin, Valerios Stais, the museum director. The device, housed in the remains of a... 3480287429

Automatic number-plate recognition It is also used for electronic toll collection on pay-per-use roads and as a method of cataloguing the movements of traffic, for example by highways agencies. ANPR is used by police forces around the world for law enforcement purposes, including checking if a vehicle is registered or licensed. Some of the freeways with ANPR are the N12, N3, N1 etc. In Stockholm, Sweden, ANPR is used for the Stockholm congestion tax Automatic number-plate recognition (ANPR; see also other names below) is a technology that uses optical character recognition on images to read vehicle registration plates to create vehicle location data. It can use existing closed-circuit television, road-rule enforcement cameras, or cameras specifically designed for the task. travelled on the particular freeway 3480287429

Church–Turing thesis It states that a function on the natural numbers can be calculated by an effective method if and only if it is computable by a Turing machine. Before the precise definition of computable function, mathematicians often used the informal term effectively calculable to describe functions that are computable by paper-and-pencil methods. In the 1930s, several independent attempts were made to formalize the notion of computability:. We list the elements of A effectively, $n_0, n_1, n_2, n_3, \dots$. The thesis is named after American mathematician Alonzo Church and the British mathematician Alan Turing. Let A be infinite RE. From this list we extract an increasing sublist: put $m_0 = n_0$, after finitely In computability theory, the Church–Turing thesis (also known as computability thesis, the Turing–Church thesis, the Church–Turing conjecture, Church's thesis, Church's conjecture, and Turing's thesis) is a thesis about the nature of computable functions 3480287429

Perfect number 28 is also the only even perfect number that is In number theory, a perfect number is a positive integer that is equal to the sum of its positive proper divisors, that is, divisors

excluding the number itself. For instance, 6 has proper divisors 1, 2, and 3, and $1 + 2 + 3 = 6$, so 6 is a perfect number. Guy's strong law of small numbers: The only even perfect number of the form $n^3 + 1$ is 28 (Makowski 1962). The next perfect number is 28, because $1 + 2 + 4 + 7 + 14 = 28$ 3480287429

Special education These interventions are designed to help individuals with special needs achieve a higher level of personal self-sufficiency and success in school and in their community, which may not be available if the student were only given access to a typical classroom education. This involves the individually planned and systematically monitored arrangement of teaching procedures, adapted equipment and materials, and accessible settings. n3, ISBN 978-1-4129-0728-6, retrieved 5 May 2025{{citation}}: CS1 maint: location Special education (also known as special-needs education, aided education, alternative provision, exceptional student education, special ed. 22–34, doi:10. , SDC, and SPED) is the practice of educating students in a way that accommodates their individual differences, disabilities, and special needs. 4135/9781848607989.
