As digital infrastructure becomes more embedded in everyday life, cybersecurity...

Cramming (fraud) Computer Forensics and Cyber Crime: An Introduction (2nd ed Cramming is a form of fraud in which small charges are added to a bill by a third party without the subscriber's consent, approval, authorization or disclosure. Computer Crime Research Center. (2009). Retrieved 2011-09-14. Britz, Marjie T. These may be disguised as a tax, some other common fee or a bogus service, and may be several dollars or even just a few cents. April 11, 2005. The crammer's intent is that the subscriber will overlook and ultimately pay these small charges without challenging their legitimacy or inquiring further

Hands-on activities and competitions such as capture the flag (CTF). According to the U.S. National Association of Attorneys General, cramming was the 4th most common consumer complaint of 2007 in the United States.

Computer crime countermeasures Cyber crime, or computer crime, refers to any crime that involves a computer and a network. Netcrime refers, more precisely, to criminal exploitation of the Internet. There are also problems of privacy when confidential information is lost or intercepted, lawfully or otherwise. Issues surrounding this type of crime have become high-profile, particularly those surrounding hacking, copyright infringement, identity theft, child pornography, and child grooming. The computer may have been used in the commission of a crime, or it may be the target. The computer may have been used in the commission of a crime Cyber crime, or computer crime, refers to any crime that involves a computer and a network

Chuck Easttom "CSCE 201 Introduction to Computer Security". Cybercrime Detection and Digital Forensics". "ACST 3530 William "Chuck" Easttom II (born October 5, 1968) is an American computer scientist specializing in cyber security, cryptography, quantum computing, aerospace engineering, and systems engineering.
