XWiki allows for the storing of structured data and the execution of server-side script within the wiki interface. Scripting languages including Velocity, Apache Groovy, Python, Ruby and PHP can be written directly into wiki pages using wiki macros. User-created data structures can be defined in wiki documents and instances of those structures can be attached to wiki documents, stored in a database, and queried using either Hibernate query language or XWiki's own query language. 2e0fd98248
