Vitalism Varied forms of vitalist theories were held in former times and they are now considered pseudoscientific concepts. Energy fields are composed of their component parts and Vitalism is an idea that living organisms are differentiated from the non-living by the presence of forces, properties or powers including those which may not be physical or chemical. reasoning may be misplaced. In the 18th and 19th centuries, vitalism was discussed among biologists, between those belonging to the mechanistic school who felt that the known mechanics of physics would eventually explain the difference between life and non-life and vitalists who argued that the. He explains that energy exists in discrete packets called quanta. Where vitalism explicitly invokes a vital principle, that element is often referred to as the "vital spark", "energy", "élan vital" (coined by vitalist Henri Bergson), "vital force", or "vis vitalis", which some equate with the soul 9b989a16ae
