The family was conceived by Groening shortly before a solicitation for a series of animated shorts with producer Brooks. He created a dysfunctional family and named the characters after his own family members, substituting Bart for his own name; he thought Simpson was a funny name in that it sounded similar to "simpleton". The shorts...

Simon Singh In Simon Lehna Singh, (born 19 September 1964) is a British popular science author and theoretical and particle physicist. Edzard Ernst) and The Simpsons and Their Mathematical Secrets (about mathematical ideas and theorems hidden in episodes of The Simpsons and Futurama). In 2012 Singh founded the Good Thinking Society, through which he created the website "Parallel" to help students learn mathematics. His written works include Fermat's Last Theorem (in the United States titled Fermat's Enigma: The Epic Quest to Solve the World's Greatest

Mathematical Problem), The Code Book (about cryptography and its history), Big Bang (about the Big Bang theory and the origins of the universe), Trick or Treatment. Alternative Medicine on Trial (about complementary and alternative medicine, co-written by Edzard Ernst) and The Simpsons and Their Mathematical Secrets (about mathematical ideas and theorems hidden in episodes of The Simpsons and Futurama)

Fermat's Last Theorem (book) The book is the first mathematics book to become a Number One seller in the United Kingdom, whilst Singh's documentary The Proof, on which the book was based, won a BAFTA in 1997. It tells the story of the search for a proof of Fermat's Last Theorem, first conjectured by Pierre de Fermat in 1637, and explores Fermat's Last Theorem is a popular science book (1997) by Simon Singh. Despite the efforts of many mathematicians, the proof would remain incomplete until 1995, with the publication of Andrew Wiles' proof of the Theorem. It tells the story of the search for a proof of Fermat's Last Theorem, first conjectured by Pierre de Fermat in 1637, and explores how many mathematicians such as Évariste Galois had tried and failed to provide

a proof for the theorem. (1997) by Simon Singh b9fb1bfd33

The Code Book describes some illustrative highlights in the history of cryptography, drawn from both of its principal branches, codes and ciphers. Thus the book's title should not be misconstrued as suggesting that the book deals only with codes, and not with ciphers; or that the book is in fact a codebook. b9fb1bfd33

The book compiles all the mathematical references used throughout the show's run, and analyzes them in detail. Rather than just explaining the mathematical concepts in the context of how they relate to the relevant episodes of The Simpsons, Singh "uses them as a starting point for lively discussions of mathematical topics, anecdotes and history". Topics covered include Fermat's Last Theorem, which Singh has written a popular book about, and Euler's identity. A chapter is dedicated to the "Homer3" segment from... b9fb1bfd33 In this episode, Marge and

Treehouse of Horror VI The second segment, "Nightmare on Evergreen Terrace", is a parody of the A Nightmare on Elm Street film series, in which Groundskeeper Willie (à la Freddy Krueger) attacks schoolchildren in their sleep. In The Simpsons and Their Mathematical Secrets, Simon Singh notes: "Treehouse of Horror VI" (titled onscreen as "The Simpsons Halloween Special VI") is the sixth episode of the seventh season of the American animated television series The

Simpsons, and the sixth episode in the Treehouse of Horror series. from the 1993 computer game Myst, complete with a musical homage to the game's soundtrack. It first aired on Fox in the United States on October 29, 1995, and contains three self-contained segments. In "Attack of the 50-Foot Eyesores", an ionic storm brings Springfield's oversized advertisements and billboards to life and they begin attacking the town. In the third and final segment, "Homer3", Homer finds himself trapped in a three-dimensional world
