In addition to the programming language, Kemeny and Kurtz developed the Dartmouth Time-Sharing System (DTSS), which allowed multiple users to edit and run BASIC programs simultaneously on remote terminals. This general model became popular on minicomputer systems like the PDP-11 and Data General Nova in the late 1960s and early 1970s. While the .NET Framework provides an extensive set of functionality, it may lack access to many lower level operating system libraries normally written in unmanaged code or third party libraries also written in unmanaged code. P/Invoke is the technique a programmer can use to access functions in these libraries. Calls to functions within these libraries occur by declaring the signature of the unmanaged function within managed... 50a92628da

Pearson-Anson effect Since the development of microelectronics, these simple negative resistance oscillators. At this voltage electrons in the gas are accelerated to a high enough speed The Pearson-Anson effect, discovered in 1922 by Stephen Oswald Pearson and Horatio Saint George Anson, is the phenomenon of an oscillating electric voltage produced by a neon bulb connected across a capacitor, when a direct current is applied through a resistor. It has been used in low frequency applications such as blinking warning lights, stroboscopes, tone generators in electronic organs and other electronic music circuits, and in time base generators and deflection circuits of early cathode-ray tube oscilloscopes. This circuit, now called the Pearson-Anson oscillator, neon lamp oscillator, or sawtooth oscillator, is one of the simplest types of relaxation oscillator. It generates a sawtooth output waveform. threshold voltage is reached (point b), called the firing or breakdown voltage, V_b 50a92628da

Tribal-class frigate In the mid-1960s, the seven Tribals were reclassified as second-class general-purpose frigates to maintain frigate numbers. After the British withdrawal from East of Suez in 1971, the Tribals operated in the NATO North Atlantic sphere with the only update being the fitting of Seacat missiles to all by 1977, limited by their single propeller and low speed of 24 knots.
