Petroleum is a fossil fuel formed over millions of years from anaerobic decay of organic materials from buried prehistoric organisms, particularly planktons and algae. It is estimated that 70% of the world's oil deposits were formed during the Mesozoic, 20% were formed in the Cenozoic, and only 10% were formed in the Paleozoic. Conventional reserves of petroleum are primarily recovered by drilling, which is done after a study of the relevant structural geology, analysis... Augmented reality Augmented reality is typically visual, but can span multiple sensory modalities, including auditory, haptic, and somatosensory. This experience is seamlessly interwoven with the physical world such that it is perceived as an immersive aspect of the real environment. These technologies are implemented in the ARKit API by Apple and ARCore API by Google to allow tracking Augmented reality (AR), also known as mixed reality (MR), is a technology that overlays real-time 3D-rendered computer graphics onto a portion of the real world through a display, such as a handheld device or head-mounted display. technologies offer varying levels of accuracy and precision. In this way, augmented reality alters one's ongoing perception of a real-world environment, compared

to virtual reality, which aims to completely replace the user's real-world environment with a simulated one 9c6f5b85e2
