Radio Radio waves are electromagnetic waves of frequency between 3 Hertz (Hz) and 300 gigahertz (GHz). In addition to  
communication, radio is used for radar, radio navigation, remote control, remote sensing, and other applications. They are  
generated by an electronic device called a transmitter connected to an antenna which radiates the waves. They can be received  
by other antennas connected to a radio receiver; this is the fundamental principle of radio communication. [citation needed]
