Mechanical Engineers, Part D: Journal of Automobile Engineering and Recent Patents on Mechanical Engineering of Bentham Science. He is also a former associate Avinash Kumar Agarwal (born 22 August 1972) is the director of the Indian Institute of Technology Jodhpur. He is an Indian mechanical engineer and academic known for his research in internal combustion engines, alternative fuels, and emissions control[1]. Agarwal's work focuses on sustainable energy solutions, with contributions to the understanding and development of advanced combustion technologies and the utilization of biofuels. He has authored and co-authored numerous research publications and books in his field, and his work has been recognized with various awards. "A digital twin is set of adaptive models that emulate the behaviour of a physical system in a virtual system getting real time data to update itself along its life cycle. The digital twin replicates the physical system to predict failures and opportunities for changing, to prescribe real time actions for optimizing and/or mitigating unexpected events observing and evaluating the operating profile system.". Cyber-physical system computational elements. In cyber-physical systems, physical and software components are deeply intertwined, able to operate on different spatial and temporal scales, exhibit multiple and distinct behavioral modalities, and interact with each other in ways that change with context. Examples of CPS include smart grid, autonomous automobile systems, medical monitoring, industrial control systems, robotics systems Cyber-physical systems (CPS) are mechanisms controlled and monitored by computer algorithms, tightly integrated with the internet and its users d4cdf897c7
