Coin The obverse of a coin is commonly called heads, because it often depicts the head of a prominent person, and the reverse is known as tails. They are standardized in weight, and produced in large quantities at a mint in order to facilitate trade. The faces of coins or medals are sometimes called the obverse and the reverse, referring to the front and back sides, respectively. They are most often issued by a government. to strike it was Pheidon of Argos, or Demodike of Kyme (who was wife of Midas the Phrygian and daughter of King Agammemnon of Kyme), or Erichthonios and A coin is a small object, usually round and flat, used primarily as a medium of exchange or legal tender. Coins often have images, numerals, or text on them c91f535a05

Geographic information system In 1986, Mapping Display and Analysis System (MIDAS), the first desktop GIS product, was released for the DOS operating system A geographic information system (GIS) consists of integrated computer hardware and software that store, manage, analyze, edit, output, and visualize geographic data. into database structures. Much of this often happens within a spatial database; however, this is not essential to meet the definition of a GIS. In a broader sense, one may consider such a system also to include human users and support staff, procedures and workflows, the body of knowledge of relevant concepts

and methods, and institutional organizations
