Radiation therapy A physician. as SBRT, or stereotactic body radiotherapy) for subcranial lesions, or SRS (stereotactic radiosurgery) for intracranial lesions. It is normally delivered by a linear particle accelerator. It may also be used as part of adjuvant therapy, to prevent tumor recurrence after surgery to remove a primary malignant tumor (for example, early stages of breast cancer). Radiation therapy may be curative in a number of types of cancer if they are localized to one area of the body, and have not spread to other parts. Radiation therapy is synergistic with chemotherapy, and has been used before, during, and after chemotherapy in susceptible cancers. The rationale of hypofractionation Radiation therapy or radiotherapy (RT, RTx, or XRT) is a treatment using ionizing radiation, generally provided as part of cancer therapy to either kill or control the growth of malignant cells. The subspecialty of oncology concerned with radiotherapy is called radiation oncology 820f597c6f

The etymological roots for the word "pharmacovigilance" are: pharmakon (Greek for drug) and vigilare (Latin for to keep watch). As such, pharmacovigilance heavily focuses on adverse drug reactions (ADR), which are defined as any response to a drug which is noxious and unintended. That definition includes lack of efficacy: that means that the doses normally used for prevention, diagnosis, or treatment of a disease—or, especially in the case of device, for the modification of physiological disorder function. In 2010, the European Union expanded PV to include medication errors such... 820f597c6f

Million Death Study the overall size of the SRS at the inception of the study in 1998. The principal investigator of the study is Dr. Surveyors visited households in the sample units of the SRS every 6 months to inquire The Million Death Study (MDS) is a study of premature human mortality conducted in India. Prabhat Jha, director of the Centre for Global Health Research and professor of epidemiology at the Dalla Lana School of Public Health, University of Toronto, Canada. It began in 1998 and ended in 2014. Among a sample size of 14 million Indians, approximately 1 million deaths are assigned as medical causes through the Verbal Autopsy method to determine disease patterns and direct public health policy 820f597c6f
