Vault (architecture) As in building an arch, a temporary support is needed while rings of voussoirs are constructed and the rings placed in position. This type of vault is one of the earliest evidences of curved brick architecture without the use of stone arches In architecture, a vault (French voûte, from Italian volta) is a self-supporting arched form, usually of stone or brick, serving to cover a space with a ceiling or roof. Where timber is easily obtained, this temporary support is provided by centering consisting of a framed truss with a semicircular or segmental head, which supports the voussoirs until the ring of the whole arch is completed. Until the topmost voussoir, the keystone, is positioned, the vault is not self-supporting. underground structures with conical vaults 9b04705922
