As a type of active management, it stands in contradiction to much of modern portfolio theory. Economic inequality
Bhattacharya, Debopam;
Mazumder, Bhashkar (2010).
Each of these can be measured between two or more nations, within a single nation, or between and within sub-populations (such as within a low-income group, within a high-income group and between them, within an age group and between inter-generational groups, within a

gender group and between them etc, either from one or from multiple nations).
ISSN 0895-3309. "A Nonparametric Analysis of Black-White Differences in Intergenerational Income Mobility Economic inequality is an umbrella term for three concepts: income inequality, how the total sum of money paid to people is distributed among them; wealth inequality, how the total sum of wealth owned by people is distributed among the owners; and consumption inequality, how the total sum of money spent by people is distributed among the spenders

Reliability engineering
Reliability is closely related to
availability, which is typically
described as the ability of a
component or system to
function at a specified
moment or interval of time.
Reliability is defined as the
probability that a product,
system, or service will
perform its intended function
adequately for a specified
period of time; or will operate
in a defined environment
without failure. Sigma,

reliability engineering solutions are generally found by focusing on reliability testing and system design. Solutions are found in different ways Reliability engineering is a sub-discipline of systems engineering that emphasizes the ability of equipment to function without failure 92bea72a6a
