Formative assessment seen as central to classroom practice, and that all teachers should regard assessment for learning as a key professional skill. It also helps faculty recognize where students are struggling and address problems immediately. The goal of a formative assessment is to monitor student learning to provide ongoing feedback that can help students identify their strengths and weaknesses and target areas that need work. It typically involves qualitative feedback (rather than scores) for both student and teacher that focuses on the details of content and performance. It is commonly contrasted with summative assessment, which.
