Explainable artificial intelligence ISO/IEC TR 29119-11:2020, Software and systems engineering, Software testing, Part 11: Guidelines on the testing of AI-based systems. The main focus is on the reasoning behind the decisions or predictions made by the AI algorithms, to make them more understandable and transparent. This addresses users' requirement to assess safety and scrutinize the automated decision making in applications. Pubs. ISO. 2020. XAI counters the "black box" tendency of machine learning, where even the AI's designers cannot explain why it arrived at a specific decision. Within artificial intelligence (AI), explainable AI (XAI), often overlapping with interpretable AI or explainable machine learning (XML), is a field of research that explores methods that provide humans with the ability of intellectual oversight over AI algorithms c07c67cb62

For example, there is a collaborative mode called multi-synchronous Computer-supported cooperative work (CSCW) or computer-supported collaboration is the study of how people utilize technology collaboratively, often towards a shared goal. These parallels allow CSCW research to inform future design patterns or assist in the development of entirely new tools. Often the goal of CSCW is to help promote and utilize technology in a collaborative way, and help create new tools to succeed in that goal. More specifically, the field of CSCW seeks to analyze and draw connections between currently understood human psychological and social behaviors and available collaborative tools, or groupware c07c67cb62
