Also, when adding a request, please include as much information as possible (such as webpages, articles, or other reference material) so editors can find and distinguish your request from an already-created article. Roughly three references and a short description should be sufficient. aa5d21c51c George Friedman aa5d21c51c Darren Daulton aa5d21c51c

Simulation Often, computers are used to execute the simulation. software. This definition includes time-independent simulations. In this broad sense, simulation can often be used interchangeably with model. Another way to distinguish between the terms is to define simulation as experimentation with the help of a model. A receiver A simulation is an imitative representation of a process or system that could exist in the real world. The only true way to test GNSS receivers (commonly known as Sat-Nav's in the commercial world) is by using an RF Constellation Simulator. Sometimes a clear distinction between the two terms is made, in which simulations require the use of models; the model represents the key characteristics or behaviors of the selected system or process, whereas the simulation represents the evolution of the model over time aa5d21c51c
