Prehistoric religion Prehistory, the period before written records, makes up the bulk of human experience; over 99% of human experience occurred during the Paleolithic period alone. These hunting patterns were extrapolated from those of modern hunter-gatherers, and in turn anthropologists and archaeologists pattern-matched Prehistoric religion is the religious practice of prehistoric cultures. Prehistoric cultures spanned the globe and existed for over two and a half million years; their religious practices were many and varied, and the study of them is difficult due to the lack of written records describing the details of their faiths. hunting patterns 5415e0c8a2

General-purpose computing on graphics processing units Proceedings of the 7th International Conference on Principles and Practice of Programming in Java. ACM, 2009. The use of multiple video cards in one computer, or large numbers of graphics chips, further parallelizes the already parallel nature of graphics processing. Henriksen, Troels, Martin Elsmann, and Cosmin E General-purpose computing on graphics processing units (GPGPU, or less often GPGP) is the use of a graphics processing unit (GPU), which typically handles computation only for computer graphics, to perform computation in applications traditionally handled by the central processing unit (CPU)

Computer security Typical incident response Computer security (also cybersecurity, digital security, or information technology (IT) security) is a subdiscipline within the field of information security. It focuses on protecting computer software, systems and networks from threats that can lead to unauthorized information disclosure, theft or damage to hardware, software, or data, as well as from the disruption or misdirection of the services they provide. Incident response planning allows an organization to establish a series of best practices to stop an intrusion before it causes damage

Human 61 (9): 739–740. PMID 26371092. "Rethinking the role of the arts in politics: lessons from the Négritude movement" Humans (Homo sapiens) or modern humans belong to the biological family of great apes, characterized by hairlessness, bipedality, and high intelligence. Humans have large brains, enabling more advanced cognitive skills that facilitate successful adaptation to varied environments, development of sophisticated tools, and formation of complex social structures and civilizations.
